

30 November 2021

Dear Parents

Year 10 Separate Science Revision Guides

This term Year 10 students have started their GCSE Separate Science courses. We are following the AQA courses in GCSE Biology, GCSE Chemistry and GCSE Physics.

The students complete examinations in each subject at the end of the two years and there is no controlled assessment. They will sit examinations in all subjects in May and June 2023.

We are able to order some revision guides that the students can buy from the school for cost price. These revision guides will cover the content needed for all the examinations for the three separate subjects throughout the course and we strongly recommend that all students have them. The price of these books is £2.85 for each separate subject making a total of £8.55 for all three.

These books are now available to order via ParentPay. This needs to be done by Friday 10th December so that an order for the appropriate books can be placed. Books that have been ordered will then be distributed via your child's tutor or Science teacher.

If your child is eligible for Pupil Premium, the guides will be ordered for them automatically – you do not need to do anything.

Yours faithfully

M Rowley
Head of Science
